

THREE-TIER DRUG PROGRAM GUIDE

THE LOCAL CHOICE PRESCRIPTION DRUG PROGRAM

REMEMBER TO SHARE THIS GUIDE WITH YOUR DOCTOR.

Introduction

Welcome to your three-tier prescription drug plan!

Your three-tier drug program gives you access to all medications in covered classes within the confines of your plan's benefit design. Some plans exclude coverage for certain drugs or drug classes such as those prescribed for dietary supplements and cosmetic conditions.

Under this program, covered brand-name and generic drugs are generally categorized into three specific tiers, and each tier is assigned a co-payment level. (A co-payment is a fixed-dollar amount you pay for each prescription.) Some diabetic supplies, such as test strips and blood glucose meters, require coinsurance with no deductible in lieu of co-payment. (Coinsurance is a percentage you pay for each prescription.)

In general, your Local Choice Drug Plan provides a prescription drug benefit that divides your prescriptions into three categories (tiers) based primarily on their cost. A number of factors are considered when classifying medications into tiers including, but not limited to:

- The absolute cost of the medication
- The cost of the medication relative to other medications in the same therapeutic class
- The availability of over-the-counter alternatives
- Clinical and safety factors

Drugs may move periodically from one tier to another. In general, tiers contain the following types of drugs:

Tier 1	Lowest co-payment	Typically, generic drugs
Tier 2	Moderate co-payment	Typically, lower-cost brand-name drugs
Tier 3	Highest co-payment	Typically, higher-cost brand-name drugs

The following pages list the most commonly prescribed covered drugs and their tier assignments or coinsurance percentage. This guide was developed to illustrate how the prescription drug program works and to provide examples of the choices available to you. It also serves as a reference point for discussing prescription options with your doctors. Together you can choose not only the most appropriate medication for your condition, but medications that can help keep your expenses as low as possible.

This booklet was designed so that generic products are listed in each drug category. Corresponding brand-name versions for these generics are shown in italics as a reference.

Please call your Member Services representative at 1 800 355-8279 or refer to the Prescription Drug section of our website at **www.medco.com** for information on medications not listed in this guide.

The three-tier prescription plan provides an excellent opportunity for you to take an active role in your healthcare. Talk with your doctor about the medications being prescribed for you and discuss alternatives.

Dear Doctor:

Please refer to the Three-Tier Drug Program Guide when prescribing for this patient. This guide does not contain a complete list of drugs in the program. A complete listing is available in the Prescription Drug section of our website at **www.medco.com**.

Please note: This guide is not intended to substitute for your professional judgment. Rather, we offer it as a tool to help you maintain clinical efficacy while taking into account drug therapy problems and costs.

Important Comments for Members:

Coverage Notification

This guide is subject to change. Your group's plan design may include or exclude additional drugs. Please refer to your The Local Choice Plan Member Handbook for the three-tier co-payments that apply to your plan. If there is a difference between this guide and The Local Choice Plan Member Handbook, the provisions of the member handbook will govern.

Important: This brochure is only one piece of your entire enrollment package. Exclusions and limitations can be found in your member handbook.

Days' Supply Notification

A 1-month supply will allow up to 34 days of medication. **Medco By Mail** will provide up to a 90-day supply of medication. Remember to ask your doctor to consider this when writing prescriptions for you.

Symbols Used Throughout This Guide:

- ↓ = Dosage reduction may be required in patients over 65.
- ▲ = Use in patients over 65 is associated with increased risk; safer alternatives may be available. If used, dosage should generally be lowered.

Section II:

Outpatient Medications Requiring a Coverage Review

Certain medications require a coverage review. In these cases, clinical criteria based on current medical information and appropriate use must be met. Information must be provided before coverage is approved. You, your doctor, or your local pharmacist may call 1 800 753-2851 toll-free to initiate a coverage review. When you use Medco By Mail, Medco will call your doctor to start the coverage review process. The review uses plan rules based on FDA-approved prescribing and safety information, clinical guidelines, and uses that are considered reasonable, safe, and effective. Members with questions pertaining to a prescription drug coverage review should contact Medco Member Services at 1 800 355-8279 for more information. The following drugs currently require a coverage review. **Please note that both lists are subject to change.**

Classification	Medications
